LOCATION

INTRODUCTION

At Berb we aim to be the leading destination for mobile video reviews. Our mission is to inspire creativity and bring joy.

OBJECTIVES

We are looking for passionate mobile software engineers to join us and help contribute to our aim of helping users explore and discover the world's creativity, knowledge and moments that matter in everyday life, all while empowering everyone to be a creator directly from their smartphones.

RESPONSIBILITIES

Responsibilities:
1. Design, implement the new-user features of our mobile application.
2. Collaborate with the design and product teams to create a world-class mobile experience.
3. Analyse and optimize iOS applications for efficiency and performance.
4. Promote robust and maintainable code, clear documentation, and deliver high quality work on a tight schedule.

QUALIFICATIONS

1. BS/MS degree in Computer Science or equivalent majors with experience in native iOS development.
2. Strong understanding of software development principles, capabilities and limitations of iOS platform.
3. Proficiency in Objective-C or Swift.
4. Ability to understand and debug large and complex code bases.
5. Good team communication and collaboration skills.
6. Passion and experience building consumer-facing products is a huge plus; We would love to hear about apps you've developed!
